💼 Employment History

Backend Engineer (PHP/Laravel) - Remote at Nativebrands Digital Agency, Lagos, Nigeria

July 2020 — Present

Projects:

Lifestyle management service (xchange)

In a team of 7, I developed an API consumed by the frontend and mobile developers using Laravel and MySQL, this app has 4 roles with different permission; sup-admin, admin, partner, and user. also include features like mini-cms for managing content on the website (videos, stories, podcasts, etc), e-commerce, user management, wallet feature, and online payment integration using paystack.

E-learning system (Academiar)

Setup of a team of 3 to build an e-learning platform like udemy, this system has 3 categories of users Admin, Instructor, and user (learner) with different access rights and permissions.

Tech stack: HTML, CSS, JS, PHP and MySQL.

E-application (Which bride is next?)

Worked with a team of 5 to build an online application for a TV reality show application and selection process, this app includes features like filling an application form online, quiz, online payment using paystack, etc.

Tech stack: HTML,CSS,JS,Laravel/PHP and MySQL.
